1. Permits, Change, Transfer, Renewal, Sale

The permittee has not submitted any new amendments to the Division since the last inspection. The permittee submitted information for the permit renewal. This is task #1902 and is due to be completed on July 28, 2004.

2. Signs and Markers

The identification signs at the gates to the property were inspected and complied with the R645 Coal Rules.

3. Topsoil

The permittee installed a four to five foot silt fence along the haul road to prevent coal fines from going on to the topsoil pile.

4.a Hydrologic Balance: Diversions

The diversion ditches were spot-checked and were functioning as designed. The permittee has cleaned out several diversions since the last inspection.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

Several of the sediment ponds did contain water but were not discharging. No hazardous conditions were noticed during the inspection. The permittee plans in cleaning out several of the sediment ponds during the summer.

7. Coal Mine Waste, Refuse Piles, Impoundments

The permittee has re-graded the outslopes of refuse pile. Rills had occurred during the snow melt this past spring. No hazardous conditions were noticed during the inspection.

8. Noncoal Waste

The area was generally clear of non-coal waste material.

19. AVS Check

An AVS check was made and no information was available in the system to compare with the Mining and Reclamation Plan.
